| Hazard | Persons at Risk | Risk Factor High, Medium or Low | Control Measures | Action to be taken |
|---|--|------------------------------------|---|---|
| Stage – slipping. | Performers | M | No staging is being used as the performance will take place at ground level or on permanent stage within venue. | Cast to monitor floor and assess risk. |
| Lighting & sound equipment | Performers setting up, striking or using during performance. | M | All electrical equipment PAT tested. Standard testing before each show. PAT certificates available for inspection. | Cast to test all working correctly before each show. |
| Cables – tripping up | Performers and audience | L | Site and group cables carefully to cause minimum possibility of risk for maximum number of people. Cover where necessary. | Cast to check layout. |
| Manual handling of staging, props, equipment – loading, unloading, setting up, striking | Performers | M | Each get-in carefully assessed by cast. | Cast to check any unforeseen obstacles, difficulties and to request help from site staff if required. |
